

doctest::detail::ResultBuilder  
::react

doctest::detail::Message  
Builder::react

doctest::detail::throwException

```
graph LR; A[doctest::detail::ResultBuilder::react] --> C[doctest::detail::throwException]; B[doctest::detail::MessageBuilder::react] --> C;
```

The diagram illustrates a call relationship between two source functions and a target function. On the left, there are two white rectangular boxes. The top box contains the text 'doctest::detail::ResultBuilder::react' and the bottom box contains 'doctest::detail::MessageBuilder::react'. On the right, there is a gray rectangular box containing the text 'doctest::detail::throwException'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both source functions call the target function.
