

doctest::detail::checkIf
ShouldThrow

```
graph LR; A["doctest::detail::checkIf  
ShouldThrow"] --> B["doctest::getContextOptions"]
```

A diagram showing a call from the function `doctest::detail::checkIfShouldThrow` to the function `doctest::getContextOptions`. The first function is in a grey box, and the second is in a white box. A blue arrow points from the first box to the second.

doctest::getContextOptions
